

**Northeast Dubois School Corporation  
Student iPad Program Insurance Form  
2018-2019 School Year  
5th & 9th Grade Only**

With the new purchase of iPads for your students this year, we were offered an insurance policy that will help the cost of repairs for you by having **no deductible**. This is something new we are trying for only the 5th and 9th grade, but hope to continue this policy with each year's new iPad purchases. The insurance plan for the Northeast Dubois 5th & 9th grade iPad Program is per student per school year. If you don't purchase the insurance plan for your student's iPad, you are legally responsible for the repairs or replacement costs of your students iPad. Your child's iPad must be returned in working condition at the end of each school year. The iPad insurance is voided if the iPad is in an unapproved case. The only case approved is the case the school provides. We sell the students the first case for \$19.50, but replacement cases cost around \$50. We know the replacement cost of the case is much higher for this grade level, but the cost of the iPad is lower along with the insurance policy having no deductibles.

Premium cost is \$25 and this covers one school year per student.

Intentional breaks are not covered under this policy and must be paid in full. Any breaks that are not covered under the policy will go under review on a case by case basis and a cost could occur up to the cost of a replacement iPad.

Please initial the box below that you choose for your student's iPad.

	I would like to purchase insurance for the iPad at the cost of \$25. I agree to the terms of the insurance policy written above.
	I have been offered insurance for my student's iPad, but I am denying the coverage. I will pay full replacement costs \$329 or cost of repairs to fix my student's iPad if it becomes broken.
